

Simple Communication and Data Exchange between IT Systems

Retail Chains increasingly value automation when cooperating with suppliers. Orders, invoices, article master etc. are exchanged electronically via EDI or XML. Of course interfaces of Central European chains, such as Billa, hogast, Metro or Spar are quite different – a problem left to suppliers to resolve ...

The significance of **Logistics** or electronic data exchange within **Technology Businesses** is ever increasing. For suppliers, whose profit margins are low, implementation expenses for electronic communication represent a considerable, if not exasperating cost strain ...

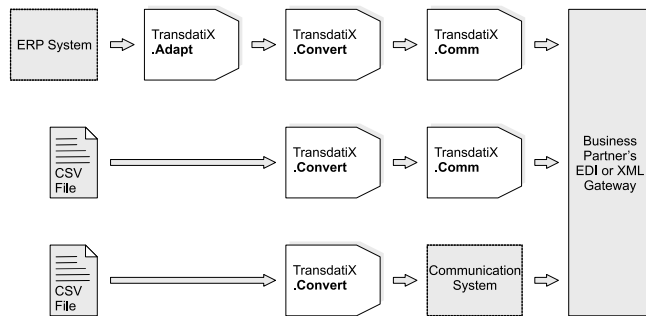

For **Information Technology**, lack of transparency in programming, invalid interfaces or incomplete data migrations cause enormous costs. Manual implementation of XML-based data transformation, however, is rather costly ...

**It doesn't have to be that way!
TransdatiX provides the solution!!**

Communication with EDI, XML & Co - ready2use or easy2do!

TransdatiX has been created for a wide range of applications, e.g. sending an invoice in your client's EDIFACT format based upon your order database, connecting data from a calculation table with a database, and synchronization of data files in various applications based on XML.

Ready2use means data conversion and communication does not necessitate any programming. Just create your invoices, delivery notes etc. etc. ... as a simple Excel file (CSV) and TransdatiX will take care of the rest. Besides the Ready2use option it is also possible to completely automatize the process: data extraction from your system, conversion, and transfer. Implementation greatly depends upon your requirements and upon the complexity of your IT environment. Therefore we can only assure you, whatever your needs are, it's **easy2do!**

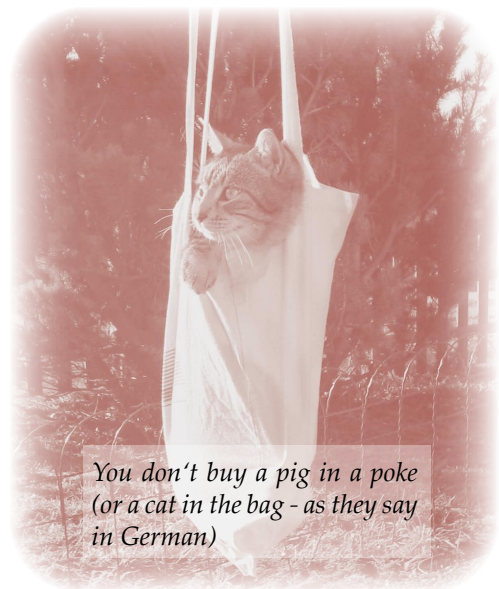

Benefits

- Cost effective EDI or XML based solution for electronic communication with clients and business partners
- Economizes costs by automatizing processes
- Current and consistent data in spite of distributed systems
- Elimination sources of errors, processes are streamlined
- Easy to use user interface for developing company specific interfaces
- Low project expenses when developing new interfaces
- One single environment for all interfaces

No Risk

30 Days Productive Usage - Free Of Charge

Use TransdatiX 30 days for free and see for yourself that ready2use is not just an empty promise! There is no risk involved: Following download of the software you register during installation. With your licence key received by e-mail you are entitled to productively use TransdatiX for free during a period of 30 days. Already during the test phase you'll be able to issue to your clients EDIFACT invoices.

*You don't buy a pig in a poke
(or a cat in the bag - as they say
in German)*

Software Subscription

Subscribe TransdatiX on a monthly basis if, for any reason, you do not want to purchase software or if for security reasons you would like to keep data in-house. No matter how many documents you send your partners – there is no quantity limit. You may thus calculate your costs in advance.
