

TransdatiX For Retail

You exchange data electronically with other organizations, or plan to switch your business transactions with suppliers to EDI?

- You plan to introduce certain standards and formats for electronic communication, or must conform to the given standards of your business partners?
- Perhaps your data emerges from a variety of sources?
- All processes should be automatized?

Electronic communication offers advantages to all parties concerned, suppliers as well as retail chains. The change to TransdatiX is a fast returning investment.

Available Interfaces (excerpt)

| Business Partner | File Type / Format |
|------------------|---------------------------|
| Baumax | article master |

| Edeka | orders |
| Gedat | delivery slips |
| Hogast | deposit returns |
| KiKa / Leiner | prices |
| Lekkerland | product data |
| Markant | invoices |
| Metro | invoice listings |
| Ökodata | complaints |
| Rewe | sales promotions |
| Schenk | |
| Spar | |
| Wal-Mart | |

«To contact the software vendor who implemented our Progress based ERP, for each new interface would limit our opportunities. Using TransdatiX does not only allow for very low-cost and secure electronic customer communication, we can realize our various demands very efficiently. This saves us a lot of money while providing us with high flexibility.»

Karl Ilgenfritz jun.
Managing Director
Ilgenfritz GmbH & Ko. KG.

Supplier's Benefits

- You'll be able to quickly conform to your customer's request for electronic data exchange without need for costly investments.
- No more risk of business failures or penalties because of conventional communication.
- Savings due to automation of your own internal processes, e.g. manual issuing and postage of invoices will cease altogether.
- If needed your customers will have access to your entire current article master data and to your price list. You'll also be present with your entire current product scale in your clients' on-line shops and procurement systems.
- No more delays due to postal delivery grace to speedy electronic invoicing.
- No more monthly organizational expenses – your new electronic routine helps you save time and costs.

The Retail Chain's Benefits

- Even small suppliers are able to finance the inexpensive TransdatiX solution. As a result, acceptance of a switch to EDIFACT-based communication is higher.
- Grace to the Ready2use deployment your suppliers do not need extensive IT know-how in order to implement our solution. Resistance to electronic communication thus can be considerably reduced.
- Well-tried interfaces deliver high data quality, no need for later corrections and costly verification processes.
- TransdatiX fosters further automation of your internal processes given that a greater proportion of your suppliers conforms to your standards.
- Trouble-free deployment of TransdatiX means internal costs of integrating suppliers into your IT systems are kept as low as possible.
